About Me

QA tester with a solid theoretical understanding of software testing regulation and capabilities. Gained valuable practical experience in completing a high-level educational project during the QA Junior+ course. Seeking to contribute to a team where I can actively improve the quality of software products and positively influence project outcomes.

Skills

- **Test Management:** TestRail, QASE, Test IT.
- **Bug Tracking Systems:** Jira, YouTrack.
- **Web application testing:** DevTools, Postman, SoapUI.
- **Mobile application testing:** Android Studio, Xcode, Charles Proxy, Fiddler, Proxyman.
- **Working with data:** MySQL, MongoDB.
- **Working with code:** Git, Bash, VSCode.
- **Operating Systems:** Windows, MacOS, iOS, Android.

Education

QA Junior+

Artsiom Rusau course

11.2024 - 02.2025

Social Work Specialist. Psychologist

Brest State A.S. Pushkin University

09.2014 - 06.2018

Experience

QA Engineer

demoshopping.ru

11.2024 - 02.2025

- Conducted detailed analysis of project and mockup requirements.
- Applied various test design methods to optimize the provisioning process.
- Conducted REST API testing using Postman for CRUD methods, and wrote basic test algorithms and scripts in Postman.
- Developed working documentation for the project (test planning, checklist, test cases (QASE), error reports (YouTrack)).
- Conducted manual testing of web applications both on the client side (using DevTools) and on the server side.

Contact: Artem Rusov - https://t.me/artsiom_qa

Sales agent

JSC "MZBN"

10.2022 - 11.2024

- Optimized product placement at the point of sale to improve consumer demand.
- Increased impulse purchases due to ease of use and behavioral analytics.
- Compliance with company product display standards.
- Systematic identification and elimination of deviations from requirements.

Counseling Psychologist

Preply.com - Freelance

2019 - 2022

- **Crisis intervention:** Providing emergency psychological assistance in more than 10 complex cases (including suicidal risks and acute conflicts), preventing negative consequences.
- **Improving the efficiency of work with clients:** psychological support programs for clients over 50 years old were developed and implemented, which led to a decrease in anxiety levels in 85% of them (according to self-reports and testing).
- **Data analysis and use of scientifically based approaches.**
- **Development and adaptation of programs** taking into account the wishes of clients.
